Likes and interests

In my spare time I really like playing football, computer games, watch series or movies, travel and spend quality time with family and friends.

Work experience

BRING IT
Software Engineer, Netsuite
march 2023 - current

- Delivered custom solutions and process adjustments for 50+ client accounts across North America and Europe, adapting implementations to diverse business needs using RESTlets, plugins, user events, client scripts, SuiteTalk, and external libraries such as SweetAlert and Alasql.
- Became a key technical reference within the team, being frequently consulted on complex NetSuite topics and actively contributing to knowledge sharing across projects.

- Developed a full custom module using Vue.js for UI and SuiteScripts for data processing, covering purchase orders, sales orders, invoices, custom records, PDF generation, and a dashboard-style panel.

- Implemented and customized the Field Service Management module, configuring the main JSON and complementing it with SuiteScripts to automate client-specific workflows.

- Built a report generator module for electronic books using Angular for visualization and SuiteScripts for data retrieval and processing.

- Integrated an electronic invoicing provider to issue and consult electronic guides directly from NetSuite.

- Applied clean code best practices and collaborated using tools such as Jira, Bitbucket, Confluence, and Git in an agile environment.

INFOSYS
Technology Analyst
june 2022 - march 2023 (10 months)

- Upgrade legacy workflow module using JBPM.io library for UI and microservices API with Spring.

- Unit testing using Junit and Mockito.

- CI/CD using Jenkins

KEEP IT SIMPLE (1 year and 3 months)
Senior developer
february 2022 - june 2022 (5 months)
Netsuite developer
april 2021 - janurary 2022 (10 months)

- Developed client-specific NetSuite customizations and electronic invoicing solutions tailored to individual business needs.

- Onboarded and trained new developers, sharing technical knowledge on SuiteScript and NetSuite best practices.

- Successfully implemented a custom Electronic Invoicing module using SuiteScripts and web services integration.

- Applied NetSuite tools: SuiteScript 1.0 & 2.0, SuiteBundle, SuiteFlow, SuiteGL, FreeMarker, Saved Searches, and advanced PDF customizations.

Vicente Omar Mori Rojas
